

For three-quarters of a century Bauer Gear Motor has been solving drive problems everywhere where electric drives with high torque's are needed for plant and machinery. Since 1927 we have been located in Esslingen and successful throughout the world. Specialisation in geared motors has paid off for our customers and the company.

Helical Gear Motor BG Series

BG gear motor, sets new standards for reliability and economy and includes; low maintenance, total flexibility in mounting options, reduced sump capacity and years of leak proof performance.

Shaft Mounted Geared Motor BF Series

Generously dimensional ball or roller bearings, case hardened forged and ground gears, and internally and externally reinforced gearboxes ensure long, low maintenance service life.

Bevel Geared Motor BK Series

Superior protection of IP65 acc. to IEC 529 assures you that the BK series is dust tight and hose proof, and can be used outdoors or in wet and dusty environments without the use of additional enclosures.

Worm Geared Motor BS Series

Right angle worm geared motors feature; Torque up to 1.000Nm, output speeds to 300 min⁻¹. completely enclosed and sealed against dust and water spray.

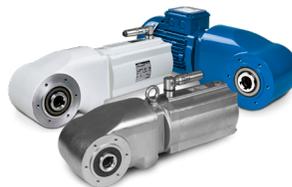

Monorail Geared Motor Drives BM Series

The BM geared motor for more efficient overhead conveyors. The clutch lever is always on the "L" side of the gear motor allowing for output shaft on both sides.

Bauer C-Adapter Motor Connection

The Bauer C-Adapter motor connection is a cost effective and space optimised adaptation for standard IEC and NEMA motors. Torque ratings up to 18.500Nm, and protection enclosure IP54 and IP65 according to ATEX.

Bauer HiflexDRIVE

The innovative HiflexDRIVE bevel geared motor range from Bauer Gear Motor characterize themselves through compactness, flexibility and efficiency. The high flexibility of the Bauer modular system makes solutions possible for almost all drive tasks. The HiflexDRIVE is available in standard, aseptic and stainless steel versions and thus fits optimally in all areas in conveyor technology especially where a long life cycle, ease of servicing, efficiency and cleanability are of utmost importance.

Energy Saving Geared Motors

The Bauer Gear Motor range of motors offers trend-setting technologies for energy efficient drives and for motor designs tailored to specific applications enabling highly efficient drive solutions without additional space with power rating 0,55 - 30kW.
